1.	Comment. Comment. The plan envisages the electrification of 1,000 km of trackage, predominantly in the Halle	25X1
,	railroad district. The re-electrification of the Magdeburg-Halle, Magdeburg-Dessau-Bitterfeld-Leipzig and Halle-Leipzig railroad lines will be given priority. According to unconfirmed information, work on the re-electrification of the Magdeburg-Dessau line was started in early July 1952.	25X1
2.	Comment. The railroad-owned Muldenstein power station was dismantled by the Soviets. Its equipment has in the meantime been returned from the U.S.S.R. Work on the reconstruction of the power station has been started.	
	• successful de time power station has been started.	25 X 1
3.	Comment. On 1 October 1952.	
	the park of damaged locomotives included 606 state-owned locomotives, 938	
	roreign-owned locomotives and 4 narrow-gauge locomotives.	25X1
	The parking of all these damaged locomotives is a heavy	
	strain on railroad parking facilities. The previous decree which prohibited	
	a scrapping of state-owned locomotives was eased in late July 1952.	25X1
	. The report indicates that more effective measures for the reduction of the park of damaged locomotives are to be taken.	
	Company of the compan	

Comment. In October, a total of 337 locomotives was scheduled to be repaired. However, only 224 locomotives were actually repaired.

It therefore appears that the production quota fixed for November will not be fulfilled.
